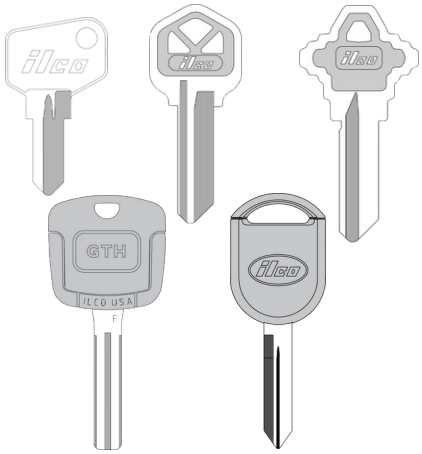
The User-Friendly Key Machine for Flat and Cruciform Keys

Rekord Pro S

Rekord Pro S

The **Rekord Pro S** is a mechanical key-cutting machine designed for flat cylinder, vehicle, and cruciform keys.



Technical Data

Power Supply: 120V-50/60Hz - 440W 2A	
Cutter Motor: Single Phase	
Prismatic Cutter: HSS (Super Rapid Steel), TiAlN coated	
Cutter Speed: 1350/1620 rpm	
Clamp: Rotating, 4-sided	
Movements: By gear on rectified carriage	
Carriage Runs: 43 mm (max. length of cuts)	
Dimensions: Width: 330 mm (including lever: 510 mm), Depth: 430 mm, Height: 270 mm	
Weight: 42 lbs	

The User-Friendly Key Machine for Flat and Cruciform Keys

The Rekord Pro S is a mechanical key-cutting machine designed for flat cylinder, vehicle, and cruciform keys.

It features quick-rotation, four-sided clamps with ergonomic handles, a mechanical tracer point with micrometric adjustment, and automatic cutter activation

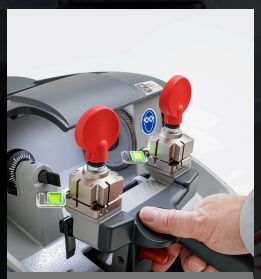
Quick Rotation Clamps: The clamps can be quickly and smoothly rotated without needing to be removed, thanks to the unique, patented rotation system. They are tightened with ergonomic handles featuring a ball-bearing system that secures the key perfectly without damaging the clamp. Made from sintered metal with a protective nickel coating, the clamps ensure exceptional strength and durability.

Long-life TiAlN coated Cutter: Made from HSS Super Rapid Steel, the cutter features a titanium aluminum nitride (TiAlN) coating. This advanced coating reduces operating temperatures, extending the cutter's lifespan.

Precise Carriage Movements: The left-hand side lever ensures precise, play-free shifts, while the self-lubricating bushings provide smooth carriage movements.

Automatic Cutter Starting: For enhanced safety, the cutter motor operates only during the key-cutting process. It starts automatically when the carriage lever is lifted and stops when the lever is released, eliminating the need for an on or off button and ensuring the cutter cannot be accidentally left running.

On-Off Brush Switch



Carriage Release Button

Integrated Tool Storage: The machine features a spacious accessories area with an anti-slip mat on top, ensuring easy access to frequently used tools. Below the machine body, a pull-out compartment is designed specifically to store the supplied accessories.

Easy Calibration: The Rekord Pro S features a mechanical tracer point with a clear, easy-to-read micrometric adjustment ring, ensuring precise calibration and high-quality cutting results.

Perfect Illumination: The Rekord Pro S is equipped with an LED strip light above the cutter, providing clear illumination of the working area.

Safe: The on-off switch includes a safety cut-out feature, preventing the machine from restarting automatically after a power interruption.

Quick Rotation Clamps

Cut Keys Finished Perfectly: The de-burring brush is Tynex coated, ensuring uniform abrasion for a flawless result.
