

# HUMMER LOCKS

General information as follows:

1. Key blank references are for the profile only, using one of the more well-known blank numbers. This list does not include all variations of different head shapes, lengths, or transponders, the main object is to identify which key profile enters the lock.
2. We supply coded or uncoded according to what is available to us from the manufacturer. All coded cylinders can be disassembled for rekeying, using the tumblers and keying kits listed. Coded locks may be substituted for locks listed as uncoded. Uncoded locks will never be substituted for locks listed as coded.
3. Identify which tumblers and keying kits to use according to the separate chart organized by the key blank numbers.
4. The dual part numbers for the same applications are the same part numbers at the same price. The number beginning with DL are Lockcraft part numbers. The ASP format part number (such as beginning with D-42-) are from the days when ASP sold only the original Ford production parts made by Hurd in Tennessee.
5. Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock.

**IMPORTANT:** RIGHT SIDE (RH) is the PASSENGER SIDE, LEFT SIDE (LH) is the DRIVER SIDE. If only one part number is listed, that part number can be used on either side.
