AUTOMOTIVE LOCKSMITH SUPPLIES

General information as follows:

1. Key blank references are for the profile only, using one of the more well-known blank numbers. This list does not include all variations of different head shapes, lengths, or transponders, the main object is to identify which key profile enters the lock. If a specific model is not listed, the correct tumblers to use can be identified by the key profile only.
2. Identify which tumblers and keying kits to use according to the separate chart organized by the key blank numbers.
3. Items marked DWO are discontinued when out. The part numbers are listed for the benefit of those who already have stock.
4. IMPORTANT: RIGHT SIDE (RH) is the PASSENGER SIDE, LEFT SIDE (LH) is the DRIVER SIDE. If only one part number is listed, that part number can be used on either side.

## Which tumblers and keying kits to use:

The chart below lists which tumblers and keying kits to use according to which key blank the lock uses.

Key Blank	Tumbler	Tumbler	Tumbler	Tumbler	Tumbler	Tumbler	Keying kits and Notes

In that case our #2 is their #3, and our #3 is their #5  The no. 2 alternate is used when necessary, if the P-30-122 does not work in a particular chamber use the P-30-124.

## Tumbler springs:

Over the years we have sold tumbler springs under several different LH part numbers. As there are very minor differences between the springs used in most Japanese and Korean locks, we have consolidated the various springs as follows:

P-00-100 - currently active part number - 100 springs per pack

Part numbers previously used, now superseded to P-00-100
